The SAGE Encyclopedia of the Internet

Three-Volume Set
 Edited by **Barney Warf** *University of Kansas*

July 2018 • 1,590 pages
Cloth (978-1-4739-2661-5) • £315.00
Special Introductory Price: £250.00

The Internet needs no introduction, and its significance today can hardly be exaggerated. More people are more connected technologically to one another than at any other time in human existence. For a large share of the world's people, the Internet, text messaging, and various other forms of digital social media such as Facebook have become thoroughly woven into the routines and rhythms of daily life. The Internet has transformed how we seek information, communicate, entertain ourselves, find partners, and, increasingly, it shapes our notions of identity and community. This encyclopedia provides the most comprehensive collection of authoritative entries on the Internet available, written in a style accessible to academic and non-academic audiences alike.

The SAGE Handbook of Web History

Edited by **Niels Brügger** *Aarhus University* and
Ian Milligan *University of Waterloo*

December 2018 • 576 pages
Cloth (978-1-4739-8005-1) • Price: £120.00

The Web has been with us now for almost 25 years. An integral part of our social, cultural and political lives, 'new media' is simply not that new anymore. Despite the rapidly expanding archives of information at our disposal, and the recent growth of interest in web history as a field of research, the information available to us still far outstrips our understanding of how to interpret it. This handbook marks the first comprehensive review of this subject to date. Its editors emphasise two main different forms of study: the use of the web as an historical resource, and the web as an object of study in its own right. Bringing together all the existing knowledge of the field, with an interdisciplinary focus and an international scope, this is an incomparable resource for both historians and students.
