## The SAGE Handbook of International Migration

Edited by **Christine Inglis** *University of Sydney*, **Binod Khadria** *Jawaharlal Nehru University*, and **Wei Li** *Arizona State University*

**September 2019 • 592 pages**  
**Cloth (978-1-4129-6175-2) • £120.00**

The rapid increase and diversification in the types of international migration over the last three decades, in conjunction with perceptions of its crucial significance far beyond the more traditional questions of immigrant settlement and incorporation in particular countries, have created a need among researchers, policy makers and commentators for definitive and informed publications which provide analysis and insights into key issues and debates which do more than report the findings of individual research projects. **The SAGE Handbook of International Migration** meets this need which remains largely unmet despite the rapid increase in a range of academic journals, policy papers and edited compendiums as well as authored publications which seek to provide an inevitably selective overview of the issues involved in the field of international migration.

Comprising 60.3 percent of the world's 7.2 billion population, Asia is an enigma to many in the West. Hugely dynamic in its demographic, economic, technological and financial development, its changes are as rapid as they are diverse. **The SAGE Handbook of Asian Foreign Policy** provides the reader with a clear, balanced and comprehensive overview on Asia's foreign policy and accompanying theoretical trends. Placing the diverse and dynamic substance of Asia's international relations first, and bringing together an authoritative assembly of contributors from across the world, this is a reliable introduction to non-Western intellectual traditions in Asia.

**The SAGE Handbook of Media and Migration** offers a comprehensive overview of media and migration through new research, as well as a review of present scholarship in this expanding and promising field. It explores key interdisciplinary concepts and methodologies, and how these are challenged by new realities and the links between contemporary migration patterns and its use of mediated processes. Although primarily grounded in media and communication studies, the handbook builds on research in the fields of sociology, anthropology, political science, urban studies, science and technology studies, human rights, development studies, and gender and sexuality studies to bring to the forefront key theories, concepts and methodological approaches to the study of the movement of people.
